CURIOSITY LEADS INNOVATION

What if curiosity could build the future?

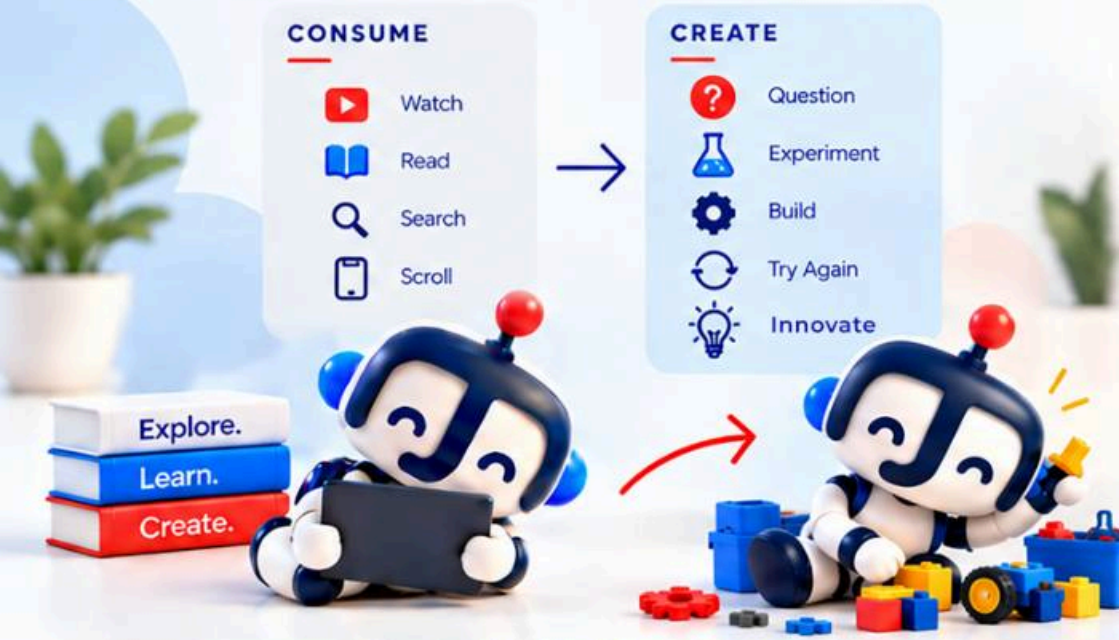
Technology | Curiosity | Innovation

FROM KNOWING TO DOING

Today's children have unprecedented access to information.
They can watch, read, search and discover almost anything in seconds.

But information alone isn't enough.

Curiosity grows when children can question, experiment, build and try again.



The next generation doesn't just need more things to learn.
They need more reasons to explore.

WE BELIEVE LEARNING SHOULD BE SOMETHING YOU EXPERIENCE

Not just read.
Not just watch.

Do. Build. Play. Experiment. Discover.

Jauntro is exploring technology-enabled products and experiences that turn curiosity into creation.

OUR AREAS OF EXPLORATION

ROBOTICS | STEM | ELECTRONICS | IoT | DRONES | MAKER EXPERIENCES

Curiosity leads innovation

WHAT HAPPENS WHEN CURIOSITY MEETS THE RIGHT PEOPLE? IT STARTS BUILDING

We're looking for Technology & Manufacturing Partners

We're exploring partners who can help us develop, customize and manufacture products for the Jauntro brand.

WE'RE LOOKING FOR

- Robotics & STEM Kits
- Electronics & IoT
- Drones & Autonomous Systems
- OEM / ODM / White-Label Products
- Custom Hardware Development
- Product Engineering & Manufacturing

Have the capability to build with us?

Let's start a conversation
